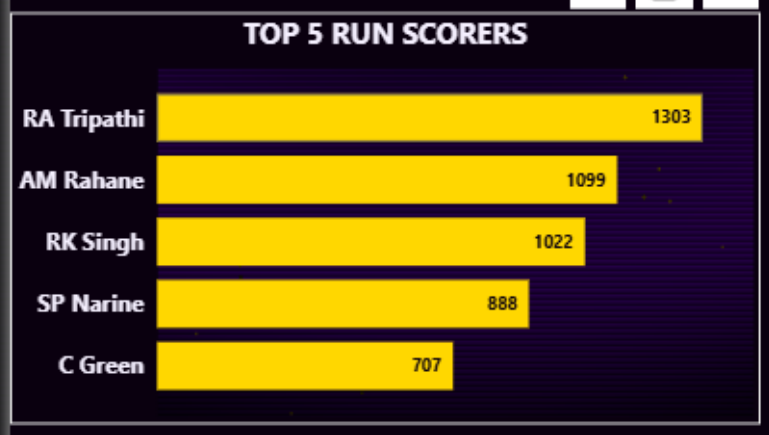
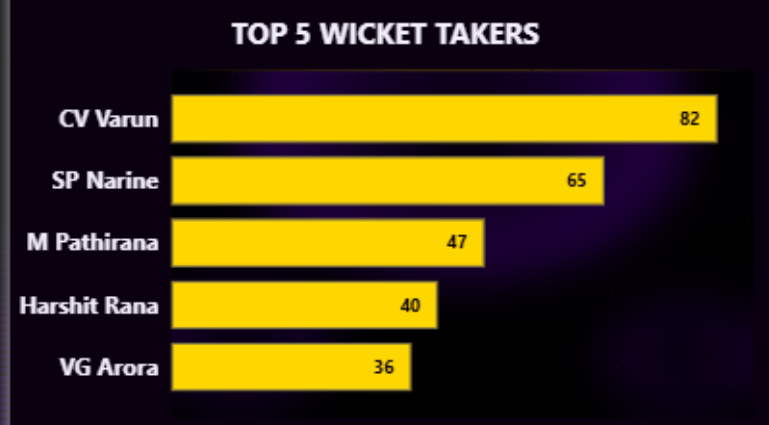
KKR 2026 · QUANTITATIVE SQUAD ANALYSIS · IPL 2021–2025



PLAYERS	RUNS	BALLS	STK RATE	INGS
RA Tripathi	1303	924	141.02	54
AM Rahane	1099	785	140.00	43
RK Singh	1022	674	151.63	43
SP Narine	888	525	169.14	55
C Green	707	457	154.70	28



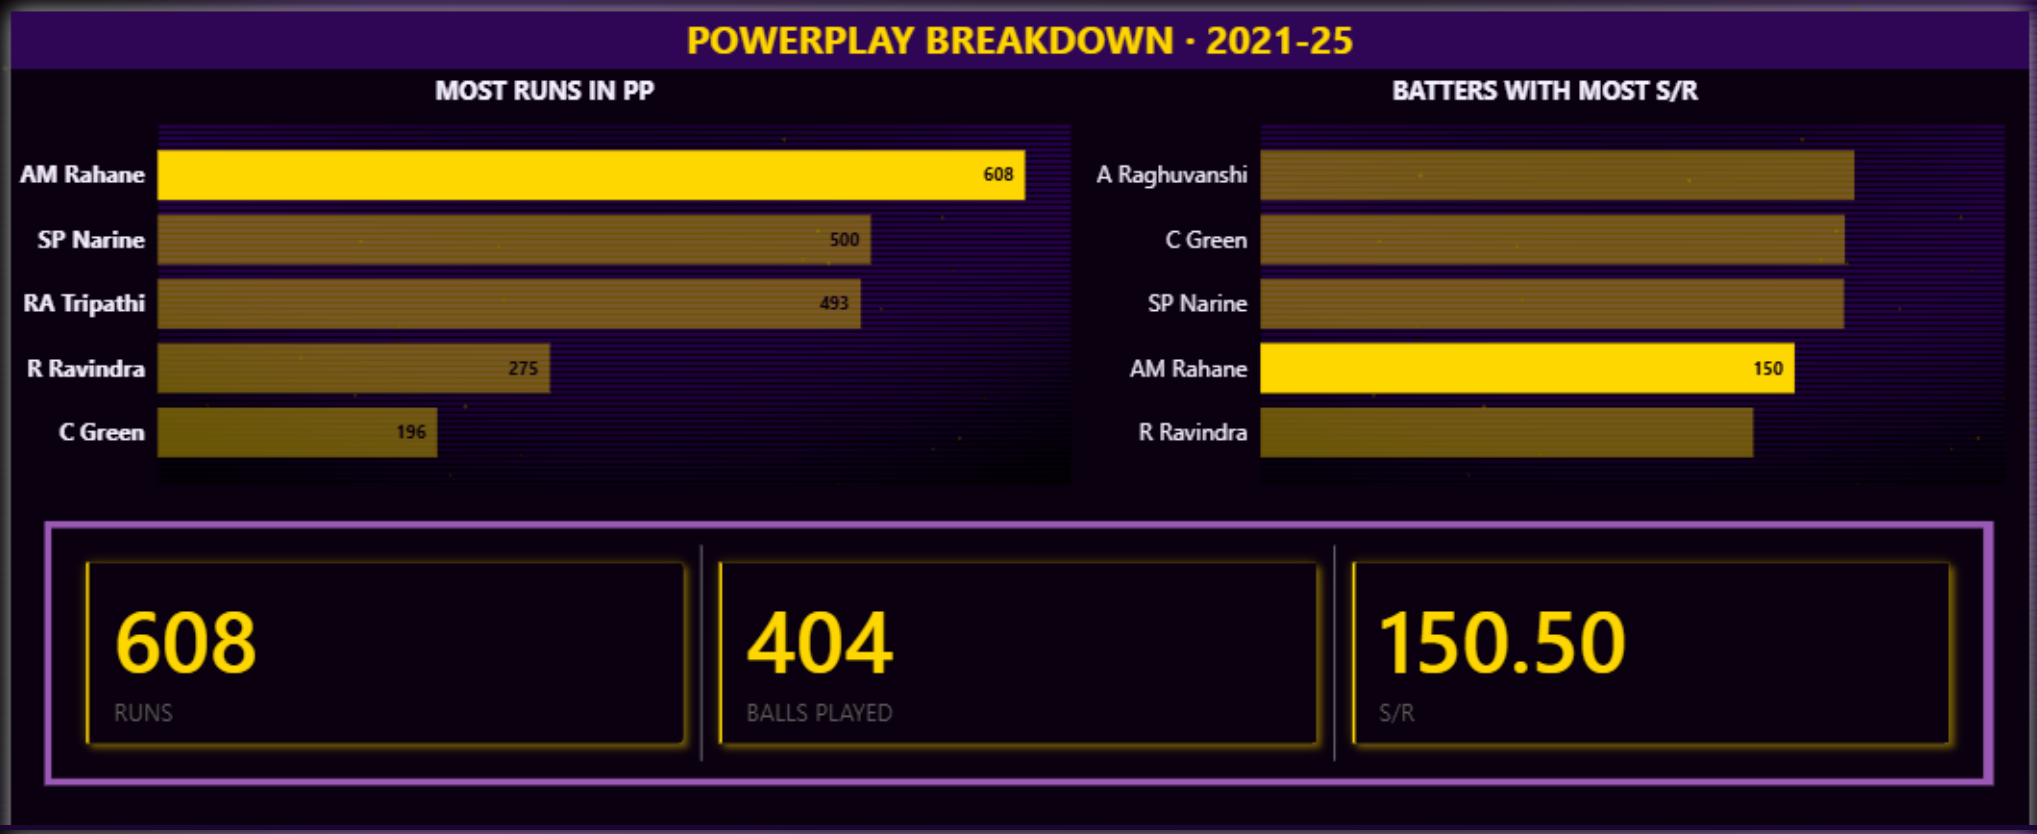
PLAYERS	WKTS	BALLS	ECN
CV Varun	82	1558	7.68
SP Narine	65	1560	6.83
M Pathirana	47	702	8.68
Harshit Rana	40	649	9.51
VG Arora	36	638	9.55

Rahul Tripathi has been KKR's highest run-scorer over the last five IPL seasons, yet he has often been left out of the playing XI.

Given the inconsistency in other batting combinations, KKR could benefit from better utilization of a proven performer like him.

On the bowling side, Varun Chakravarthy has been one of KKR's key wicket-taking assets. However, his dip in form this season has significantly impacted the team's performance.

“



AJINKYA RAHANE

KKR's most consistent powerplay run-scorer over the last five seasons, maintaining a strong strike rate Of **150.5** in Powerplays.

However, his recent form and captaincy have come under scrutiny, highlighting that past performance doesn't always translate into present success.

SUNIL NARINE

He is a high-impact player at the top of the order. While he can be explosive on his day, his effectiveness reduces in lower batting positions.

KKR needs a clearer strategy to maximize Narine's role and impact.

PLAYERS	RUNS	BALLS	STK RATE	INGS
C Green	707	457	154.70	28

CAMERON GREEN

KKR's most expensive signing this season is yet to deliver a truly impactful innings in the first six matches.

If KKR aims to stay in the playoff race, they will need significant contributions from him in the games ahead.

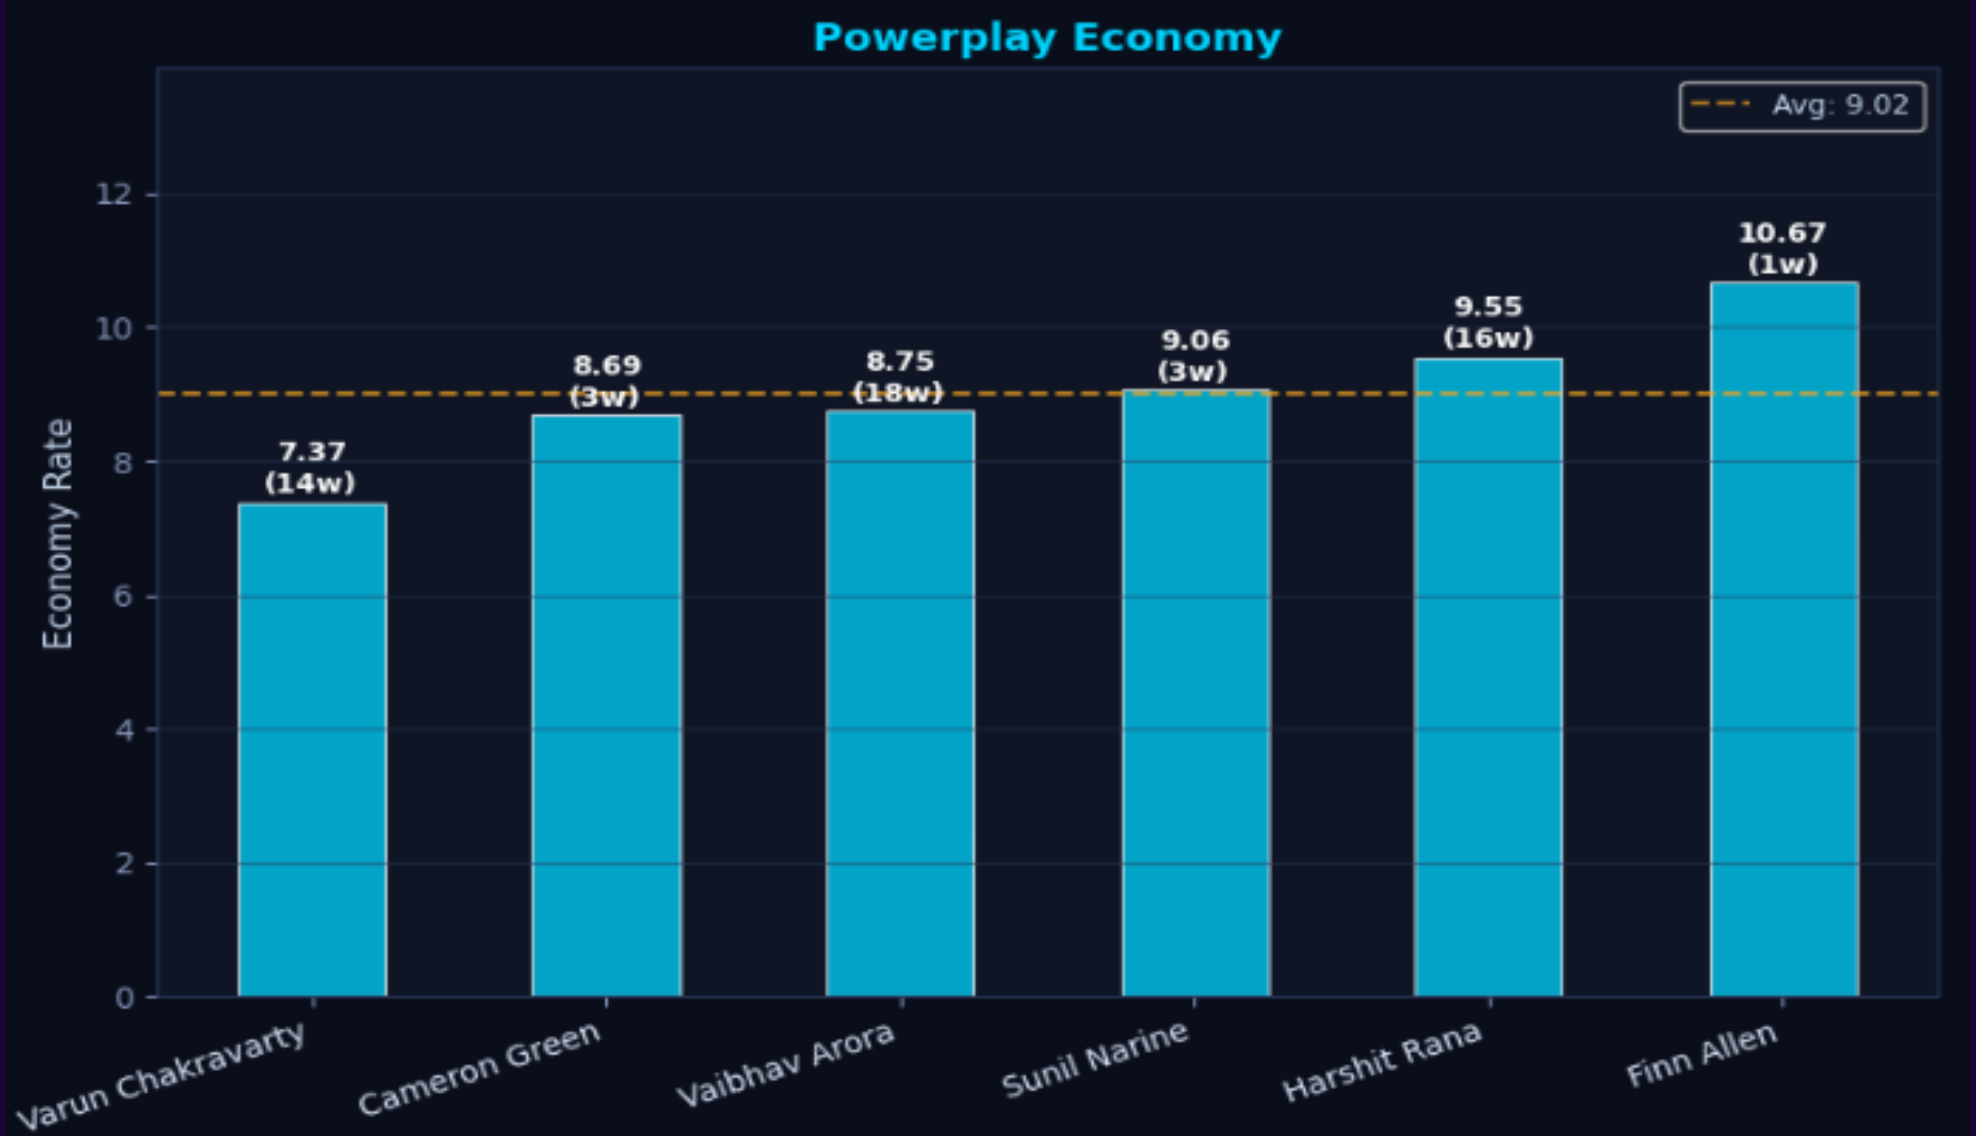
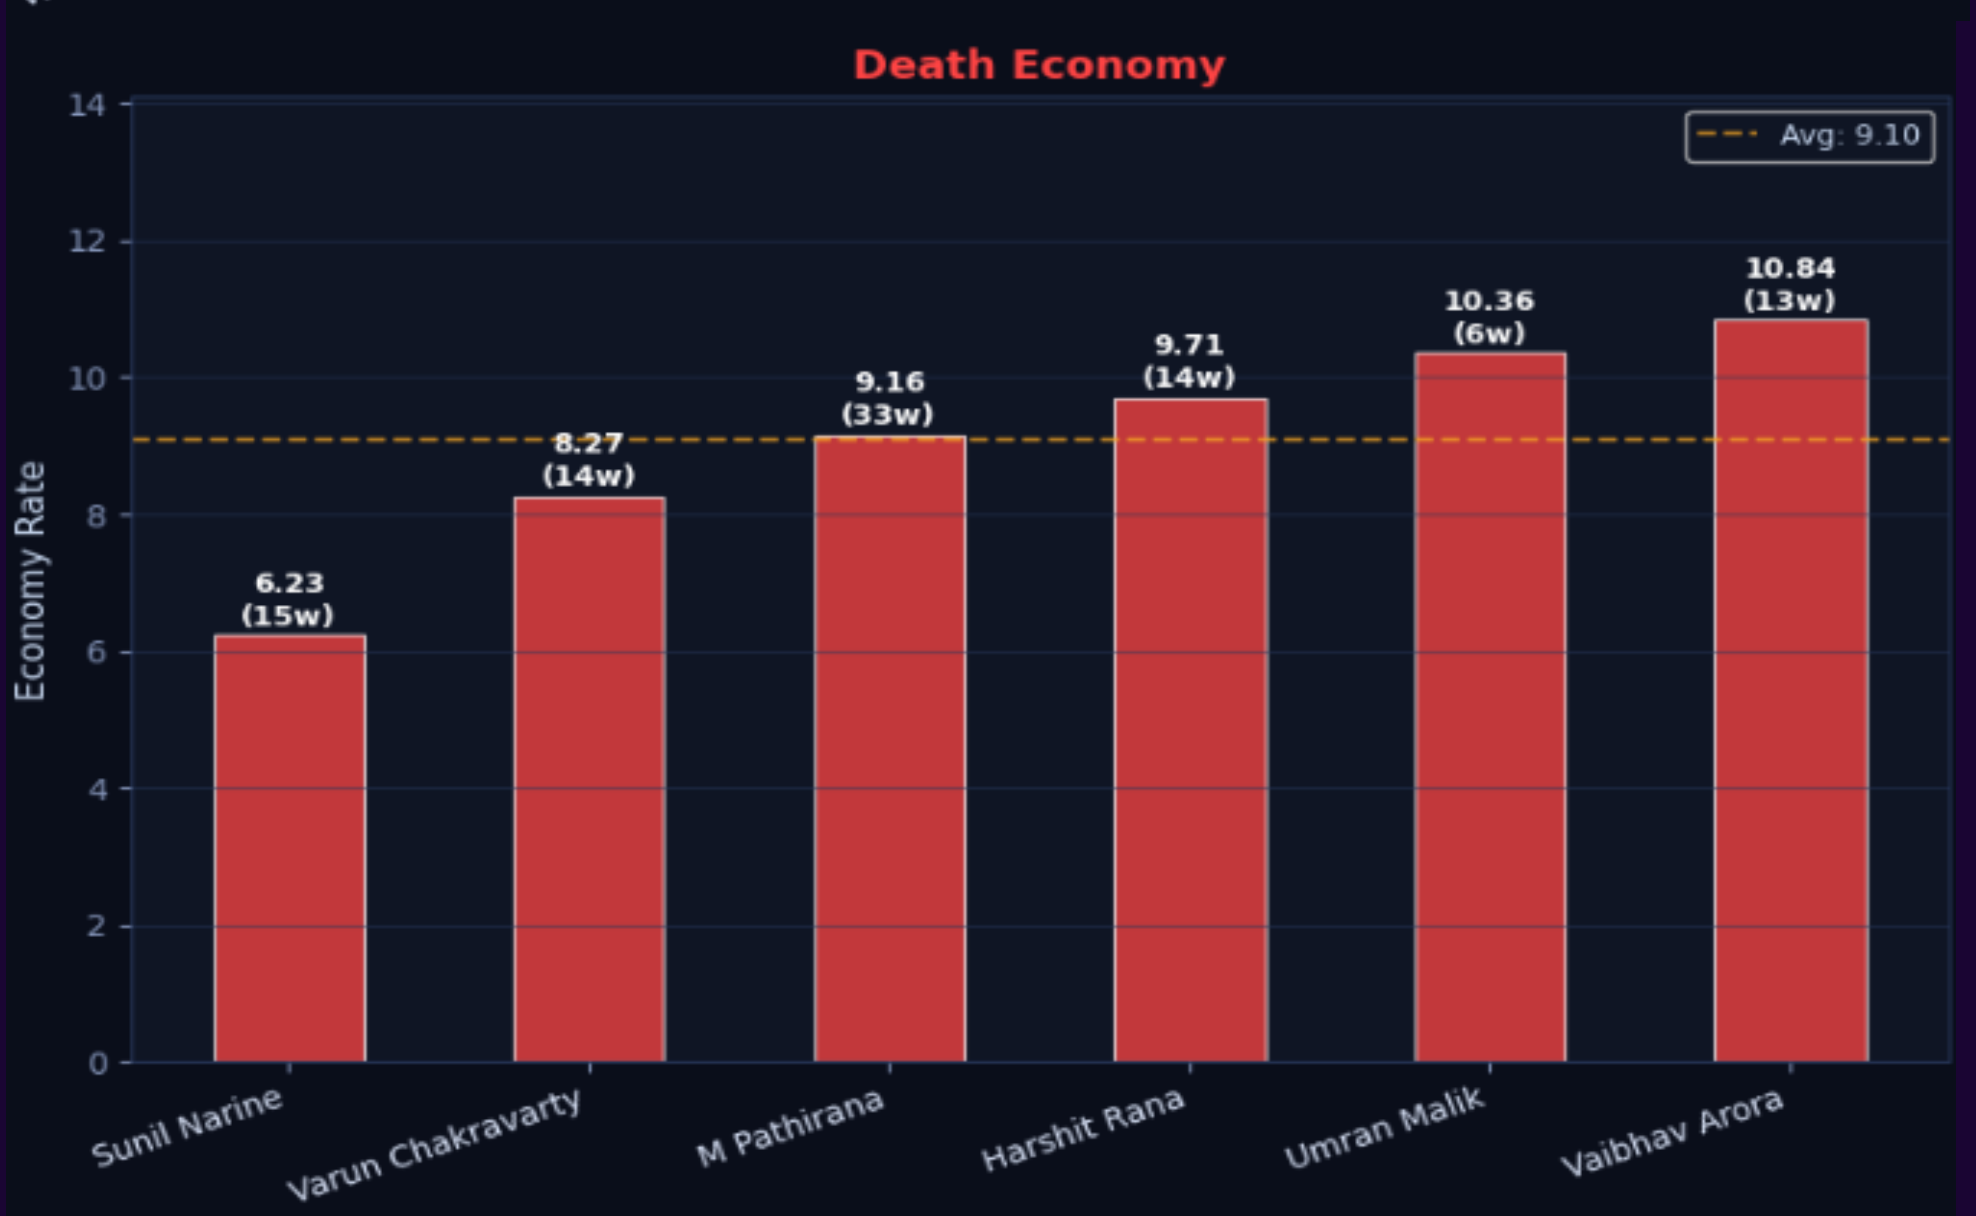
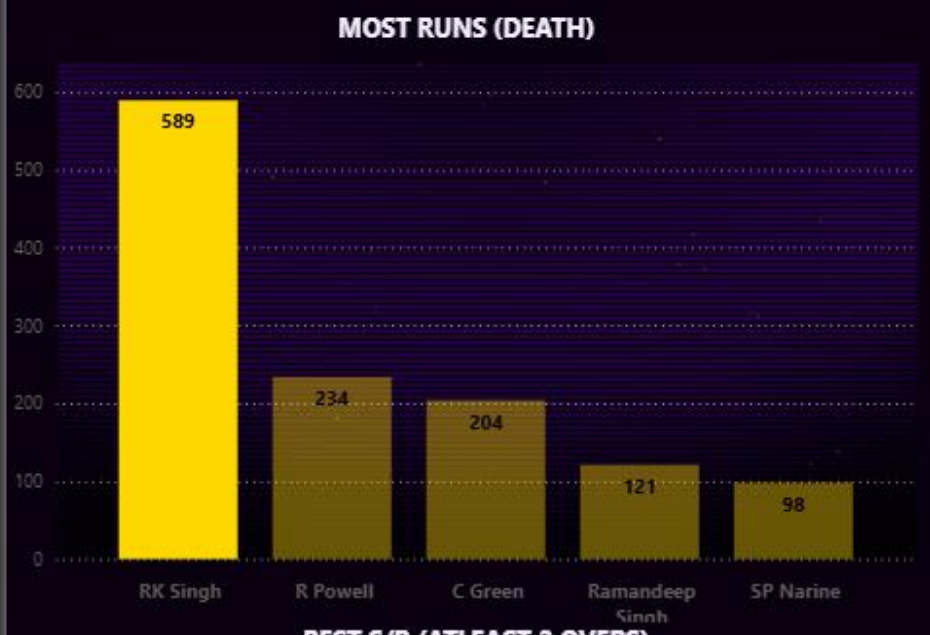
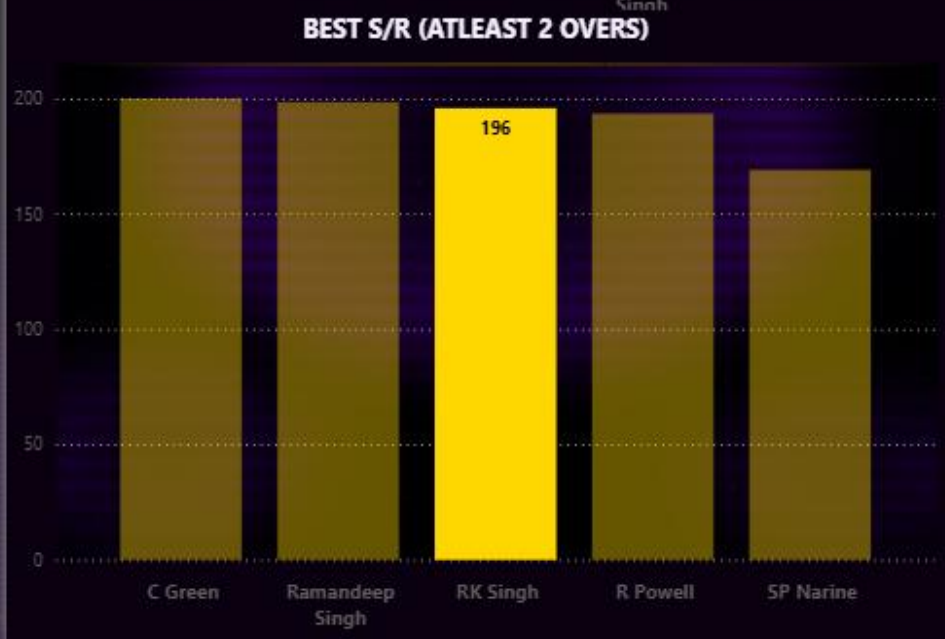
Best Economy by Phase – KKR Bowlers (min 3 overs)





DEATH OVERS ANALYSIS · 2021-25





589 RUNS

301 BALLS

195.68 S/R

BEST DEATH BATSMAN

RINKU SINGH

195.7 DEATH S/R

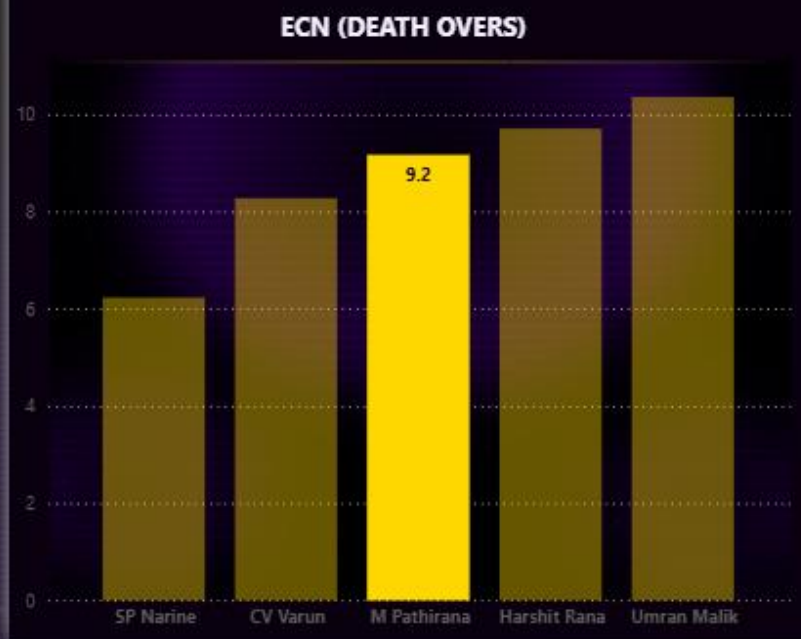
589 DEATH RUNS

301 BALLS FACED

30 INNINGS

Why Rinku? 589 death-over runs across **30 innings** is the highest volume in the squad by a mile. His SR of 195.7 with that sample size makes him the most proven death finisher. Cameron Green (200.0 SR, 13 inn) and Ramandeep Singh (198.4 SR, 13 inn) have higher strike rates but far fewer innings.

DEATH OVERS ANALYSIS · 2021-25



33	67.00	614	9.16
WKS	OVERS	RUNS CONCEEDED	ECONOMY

BEST DEATH BOWLER

MATHEESHA PATHIRANA

33	33	9.16
	DEATH WKTS	DEATH ECON

126	32
DOT BALLS	MATCHES

Why Pathirana? 33 death wickets in 32 matches is the best in the squad. His 9.16 economy is also better than Harshit Rana (9.71). Narine is miserly at death (6.23 econ) but with only 15 death wickets, Pathirana is the clear **#1 death weapon**.

KEY HIGHLIGHTS

- Matheesha Pathirana's arrival has strengthened KKR's bowling depth, addressing earlier weaknesses.

- The spin duo of Sunil Narine and Varun Chakravarthy remains crucial, but Chakravarthy needs to improve form to make the attack more effective.

- Rovman Powell, brought in as a replacement for Andre Russell, is yet to deliver impactful performances and must step up.

- Cameron Green needs to regain form to provide stability in the middle order.

- At the top, Angkrish Raghuvanshi and Ajinkya Rahane must ensure consistent starts and anchor the innings.

- KKR should also explore better utilization of Rahul Tripathi in the playing XI, given his past consistency.

THANK YOU!
